

iCS Express

Friday, 10 October 2008

iCS Express is a low-cost technology collection solution, developed especially for entities that manage small volume portfolios and do not require all the features of iCS Enterprise for its management. iCS Express has a quick and easy installation, it does not need any additional licenses as it brings the packaged software base that is required for its operation; maintenance is contracted quarterly. Also it has the possibility to scale from iCS Express to iCS Enterprise.
